Sheraton Park Hotel is a Starwood Group Hotel located in Chennai, India. This hotel is one of Chennai's long-standing, iconic landmarks. The five-star hotel offers a choice of 287 rooms and suites. The lighting design for the Sheraton Park Hotel in Chennai focused on creating multiple layers of light to utilize architectural features as focal points. Light grazes the relief wall to emphasize its texture and sculpture quality and screens were backlit to highlight their intricate textures. The lighting design blends into the architecture to accentuate the textures and materials. We worked with the interior designer to create custom decorative fixtures and seamlessly integrate the lighting into architectural details.
